Data Services and Insights

Empowering Life Sciences with Data-Driven Precision and Efficiency

Conexus Solutions, Inc. is the trusted partner for emerging life sciences companies that want to harness the full potential of their data, drive transformative insights, and foster operational excellence.

Our Data Services & Insights practice delivers specialized services meticulously organized to enhance data-driven decision-making for commercial leaders within small to mid-sized life science companies.

Customer Need

In today's data-driven business landscape, companies rely on effective data management, analysis, and utilization to drive strategic initiatives. Our Data Services & Insights offerings are tailored to meet these specific needs:

1. **Unified Data Access** – Life science organizations need a unified repository to ensure consistent and reliable information. Our solutions centralize data, providing a single source of truth for seamless accessibility and integration.

2. **Streamlined Data Management** – Managing vast quantities of data is a growing challenge. Our offerings provide streamlined and efficient data management, enabling life science organizations to handle and utilize data more effectively.

3. **Enhanced Data Quality** – The accuracy and reliability of data are critical in life sciences research. Our solutions ensure enhanced data quality through robust validation and quality control measures.

4. **Rapid Data Retrieval** – Rapid access to data is essential for timely research and decision-making. Our tools facilitate quick and effortless data retrieval, offering real-time insights that accelerate life sciences innovation.

5. **Data-Driven Decision Making** – In the life sciences sector, making informed decisions based on comprehensive data analysis is paramount. Our offerings empower organizations with insights to drive strategic decisions.

Our Industry Experience

Data Sources
- IQVIA
- Veeva
- Steeprock KOL
- Speaker Program Data
- 867/852 Data
- Client Specific Data

Software Technologies
- PowerBI, Tableau, WhizAI, and InsightX
- Microsoft Azure, AWS, and Snowflake
- Veeva Systems
- Salesforce

Key Offerings

We structure our services and solutions under five core data-related competencies, providing flexible access to stand-alone services or comprehensive solutions tailored to your organization's needs.

Commercial Data Platform – A comprehensive data platform that provides an end-to-end accelerated data management solution with robust features and capabilities to streamline the entire data lifecycle. Includes options for custom platform builds and out-of-the-box solutions.

Data Management and Operations – A versatile suite of data management services designed to optimize and govern your data assets, enhancing their value and usability. These services can be utilized as a complete package or as individual stand-alone solutions.

- Data Warehouse
- Master Data Management
- Data Governance
- Data Stewardship
- Data Migration
- Data Integration

Performance Reporting Visualization – Delivering advanced analytic services for swift and informed strategic and operational decision-making, catering to diverse commercial needs, facilitating seamless transitions, data optimization, and efficient report production.

Field Operations Modules – An integrated suite of tools designed to enhance and streamline field operations, ensuring that your investments drive real operational improvements.

- Roster Management
- Territory Management
- Target Setting
- Incentive Compensation

Strategic Consulting Projects – Tailored leadership expertise for life sciences organizations seeking specialized guidance without full-service commitment, offering recommendations in Data Source Assessments, Business Intelligence and Visualization, Advanced Analytics, and more.

Transform Your Data into Actionable Assets with Comprehensive Solutions.

Let's enhance your data quality, streamline operations, and drive informed decision-making together!
